

Bulletproof Plane Build Along #1

(Quick Dimension reference Sheet - American)

How to lay out dimensions for wing on foam:

Mark all of the intersecting points of the wing dimensions on the foam. All measurements should be made from the centerline of the wing. This will make sure it is square and true in dimension. Then use a straight edge ruler and fine point pen or marker to connect the dots. This will complete the shape of the wing on the foam.

Bulletproof Plane Build Along #1

(Quick Dimension reference Sheet - Metric)

How to lay out dimensions for wing on foam:

Mark all of the intersecting points of the wing dimensions on the foam. All measurements should be made from the centerline of the wing. This will make sure it is square and true in dimension. Then use a straight edge ruler and fine point pen or marker to connect the dots. This will complete the shape of the wing on the foam.
